

Orpheus Privilege D/A Converter

Privilege DAC is an innovative mono-bloc construction developed in collaboration with an internationally acclaimed designer. It has been built to the highest mechanical quality standards and with a casing created by specialized sub-contractors from Swiss “watch Valley”.

The D/A Converter has been carved from a homogeneous 100 kg cast aluminium block and processed specifically to obtain a unified shape and a pure and natural aluminium colour. The Orpheus Privilege D/A converter demonstrates the possibility of merging creative mechanical design with innovative audio technologies. Orpheus Privilege D/A converter has built upon the success of Orpheus One SE and pushes the limits even further for pure audiophile. For the outstanding digital and analogue worlds, Orpheus Privilege D/A converter is the perfect bridge between the two.

Features

- Exclusive Q5: 24-bit/384 kHz digital to analogue conversion
- Latest generation upsampling technology for enhanced digital audio playback, especially for the CD medium
- Phase inversion
- Digital inputs: AES/EBU, 2 x coaxial, 2 x RCA, TosLink
- In put format: 16 to 24 bits 44.1 to 192Khz
- Analogue outputs: Unbalanced RCA and balanced XLR
- USB port for update firmware
- User-adjustable display lighting (100%, 75%, 50%, 25%, OFF)
- In Night Mode, the display remains off, but illuminates briefly to confirm a command
- Physical controller with an optical rotary encoder and a push function
- User-selectable input names up to 10 characters
- Highest quality analog stage with audiophile components.
